DETAILED ACTION

Applicant's election without traverse of Group I (claims 1-23) in paper # 7 is acknowledged. Claims 24-48 are withdrawn from consideration as being drawn to non-elected subject matter.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 1-23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The following reasons apply:

- a. The term "comprising" in the compound claims (e.g. in the definition of 'heterocyclic ring') renders said claims indefinite because it includes limitations that are not recited herein. For the claimed compounds, unknown moieties render their final structure elusive.
- b. The moiety, "amino acid ester of ...", is not an art-recognized moiety. There is no description of such a moiety in term of structure, or function.
- c. Claim 5 lacks antecedent basis because it recites the limitation of "OCH₂CH₂N(CH₃)₃⁺", which is not recited in claim 1.

Art Unit: 1624

Double Patenting

The **nonstatutory double patenting** rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1, 6, 10, 11, 14, and 15 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 6, 12, and 20 of copending Application No. 09/ 360,020; and over claims 1, 3, 4, 13 of copending Application No. 09/ 589,476. Although the conflicting claims are not identical, they are not patentably distinct from each other because the compounds, compositions, and methods claimed in the co-pending applications are embraced by the instant claims.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1624

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by **Brocks et. al.** (Drug Disposition—Clin. Pharmacokinet., 26(4), 1994, 259-274). On page 270, Brocks discloses several metabolites— the second metabolite is embraced by the instant formula I with the following substituents:

- i. R^1 is lower alkyl; R^2 & R^3 – each is hydrogen;
- ii. Either R^4 or R^5 is lower alkyl, and the other is hydrogen;
- iii. R^6 is lower alkyl; R^7 is hydrogen;
- iv. Y represents $(CH_2)_{1-3}C(O)$;
- v. X is O, and Z represents 1'-D-glucuronyloxy.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Art Unit: 1624

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by **Vigano** (US 6,066,741). On column 1, Vigano discloses an intermediate of formula (IV) which is embraced by the instant formula I with the following substituents:

- vi. R^1 is lower alkyl;
- vii. R^2-R^7 – each represents a hydrogen;
- viii. X is O;
- ix. Y-Z represents $(CH_2)_{1-3}R^8$;
- x. R^8 is (C_2-C_4) acyloxy.

Thus, at the time of the invention, one skilled in the art would have known how to make certain compounds claimed herein.
